

**IN THE SPECIFICATION:**

The specification as amended below with replacement paragraphs shows added text with underlining and deleted text with ~~striketrough~~.

Please REPLACE the paragraph beginning at page 7, line 3, with the following paragraph:

As apparent from the above description, according to the built-in refrigerator in accordance with the present invention, since a housing thereof maintains a constant distance with an adjacent structure installed at its upper side, a door can be arranged so that its front surface is in parallel to a front surface of the adjacent structure, and the door is vertically hingable without any interference by the adjacent structure, thereby being capable of preventing damage to the door or any inconvenience of use. Also, the heat exchange efficiency of the machine room is improved by facilitating air circulation in the machine room using the grill having through holes and the chassis having openings.
